

## NATIONAL RAIL TIMETABLE

This timetable is valid from Sunday 17 May to Saturday 12 December 2026 inclusive and contains details of all train services operating in England, Scotland and Wales.

This definitive guide has been created by Allan Woodburn and the team at Velociti Solutions (formerly Fabdigital), whose data and design experts have many years' collective experience of timetable production. Using our own in-house bespoke timetable software, timetable data is downloaded, edited and formatted to create the individual tables contained within this publication.

The data was downloaded no earlier than 12 February and with daily checks for any amendments was correct as of 17 April. Service changes will continue to be monitored on a weekly basis and updates made where appropriate.

All pages are formatted as A4 PDFs, so can be easily printed. From May 2026, the National Rail Timetable file structure has been changed to reduce the length of the file names. It has been recognized that longer file names may fail to open on some computers, so action has been taken to minimize the file names down to shorter entries like "Table 001.pdf".

In doing this, the Tables Directory file now contains links to the file system to be able to open a PDF by clicking on the description table number. Using a free PDF reader such as the lightweight SumatraPDF Reader makes this a very simple solution. The Adobe Reader may cause additional security pop-ups when opening these tables.
